

LEGAL STATEMENT

This project was developed for UCL's Industry Exchange Network (IXN) programme and this software is a proof-of-concept for development purposes without further testing and/or redevelopment. No real data or personal information should be stored using this software. Its usage and liabilities are your own when you use this application.

The software is licensed under the [AGPLv3 license](#) and the source-code of our project can be found [here](#). Any images or icons used for this website have been attributed when needed. [Freepik](#) has been used for illustrations in certain parts of this website.

Project Developer Details:

Clients : Dr. Joseph Connor (NHS, IXN)

Teaching Assistant : Hongxiang Chen (UCL)

Development Team :

- Ahmad Daniel
- Sarvesh Rajdev
- Nathan D'Souza
- Yipeng Qu

DATA PRIVACY AND PROTECTION

The Care Quality Dashboard (CQD) collects as minimum information needed to identify the users. For registering, only email address and password are needed. Passwords are stored using PBKDF2, with hashing and salting for extra security.

Other information which may be logged include the Internet Protocol (IP) address, browser type and operating system. The system, too, may store data in the form of cookies.

Since data protection is our main concern, no data is shared or processed without users' consent. Our system also complies with the [Caldicott 7 Rules](#), which focuses on protecting patient confidentiality.

SUSTAINABILITY AND COSTING

At present, our platform is hosted on a Linode Virtual Private Server (VPS), which has been provided to us and paid for by the NHS. No cost is incurred to host the platform.

LICENSES AND INTELLECTUAL PROPERTY

All the dependencies used in this project have been allowed for commercial use. Below is an extensive list of all the dependencies included :

1. Env-cmd (<https://github.com/toddbluhm/env-cmd>)
2. Chart.js (<https://github.com/chartjs/Chart.js>)
3. Less.js (<https://github.com/less/less.js>)
4. Next.js (<https://github.com/vercel/next.js/>)
5. Next-auth (<https://github.com/nextauthjs/next-auth>)
6. Nexttranspilemodules
(<https://github.com/martpie/next-transpile-modules>)
7. Node fetch (<https://github.com/node-fetch/node-fetch>)
8. OpenAPIValidators (<https://github.com/openapi-library/OpenAPIValidators>)
9. Pg (<https://github.com/go-pg/pg>)
10. Proptypes (<https://github.com/facebook/proptypes>)
11. React (<https://github.com/facebook/react>)
12. Reactchartjs2
(<https://github.com/reactchartjs/react-chartjs-2>)

13. Reactcopy-to-clipboard

(<https://github.com/nkbt/react-copy-to-clipboard>)

14. React[react-dom]

(<https://github.com/facebook/react/tree/master/packages/react-dom>)

15. React-wordcloud

(<https://github.com/chrisrzhou/react-wordcloud>)

16. Rsuite (<https://github.com/rsuite/rsuite>)

17. Swagger-jsdoc

(<https://github.com/Surnet/swagger-jsdoc>)

18. Swr (<https://github.com/vercel/swr>)

19. Material UI (<https://github.com/mui-org/material-ui>)

20. Prisma (<https://github.com/prisma/prisma>)

21. Next-plugins (<https://github.com/vercel/next-plugins/tree/master/packages/next-less>)
